

WANT TO KNOW HOW TO OPTIMISE YOUR CLEANING AND WASTE DISPOSAL ORDER?

TIPS AND TRICKS

- Avoid light-coloured flooring. It'll get scuffed very quickly and look dirty. The best colour is still anthracite grey.
- If Palexpo manages your stand cleaning, you can avoid the hassle of coordinating access for your staff. This also means that you can benefit from fast-responding service providers for any unforeseen needs during the day.
- If you are palletising a single type of waste (e.g. wood), it will be easier to assess its volume (in m³) and apply a cheaper disposal rate than for mixed waste.

USEFUL INFORMATION:

- Palexpo has ISO 20121 certification, and we make consistent efforts to improve the impact we have on the environment. We succeeded in recycling 78% of all our waste in 2019. Please help us further improve our score by using the waste sorting solutions at your disposal.
