

## WANT TO KNOW HOW TO OPTIMISE YOUR SUSPENSION ORDER?

### TIPS AND TRICKS

- «Compare apples to apples.» Actually, the installations carried out by Palexpo's suspension service are done before the first day of assembly. This means that all of assembly time can be used for other tasks. Similarly, Palexpo's quotation does not include any costs of moving the beams in our on-site stocks or of transport, accommodation or meals for the riggers. As a result, it's a good idea to compare full-cost estimates to determine what will work best for you.

### USEFUL INFORMATION:

- Only the suspension points need to be installed by Palexpo's suspension service. Any other suspended material does not need to go through the service. However, Palexpo obviously offers complete suspension services with the capacity to intervene on site at any time.
